Commercial Property Coverage

Declarations

Policy: CP-26-515626; Named insured: Lakeshore Surgical Center LLC

Effective 2026-01-01; expires 2027-01-01 (exclusive).

Building limit: $750,000.00; Business Personal Property limit: $250,000.00.

Covered Causes

This form covers direct physical damage from a sudden, unintended discharge of water within a plumbing system.

Valuation Basis

Loss is valued at reasonable like-kind repair or replacement cost of verified event-related damage. A priced independent review may accept a contractor lump-sum line after scope and price review; an invoice alone is not acceptance. Unsupported upgrades are not included in the restoration basis. Independent verified repairability evidence is required for replacement.

The scheduled valuation basis has no depreciation holdback, coinsurance, sales tax or business-income coverage. USD only. Expenses in this dataset are tax-exclusive. General contractor overhead and profit may be added once to eligible accepted building repair lines only when separately supported. It does not apply to separate mitigation, equipment or remediation invoices.

Deductible

A $25,000.00 deductible applies once per occurrence. Apply available sublimits and remaining coverage-part limits first, then allocate remaining deductible to Building before BPP. Prior deductible satisfaction is credited. Round each component and O&P once to cents using half-up rounding.

Attached Forms

Only forms listed in the policy administration endorsement schedule with this policy ID and an effective date spanning the loss are attached. The form hash binds the actual document. An unavailable or inconsistent applicable form requires review.

Conditions

The insured must protect property and provide records. Conditions involving prior deterioration, exclusion or uncertain causation must be referred for human coverage review; a model cannot deny a claim.
