Independent Trade Cost Memorandum

Review Assignment

Cost file for Northbend Imaging Center LLC, CLM-26-385027. Prepared by Northstar Building Cost Consultants on 2026-09-04.

The two proposals cover the same room use and marked loss footprint. The targeted sequence retains more individual modules; the assembly sequence removes the continuous finish run. Separate local trade comparisons were prepared for each sequence. The shutdown calendar supplied with the file has no selected sequence entered.

The comparison uses current local trade prices for the described work. Lump-sum allowances include normal labor, materials, waste and access within each priced scope. Prices are in USD before tax.

Reviewed Line A1

Targeted repair approach

Submitted line: $140,000.00. Independently reviewed lump-sum allowance: $140,000.00.

The allowance follows the independent takeoff and local trade comparison recorded in this cost file.

Reviewed Option B1

The assembly scheme uses the broader removal boundary on sketch A for the same procedure room. Its independently reviewed reasonable price is $165,000.00. The targeted scheme uses sketch T and has a $140,000.00 comparison price. The two schemes restore the same room geometry with different removal and jointing sequences.

Price Comparison Schedule

Line	Scope description	Submitted	Review opinion
A1	Targeted repair approach	$140,000.00	$140,000.00
